DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 6-7, the phrase "larger in an area" is unclear as to the comparative of "larger" (larger than what?).

In claim 1, line 7, the term "the higher density value" lacks proper antecedent basis.

Allowable Subject Matter

3. Claims 1-9, insofar as they are understood, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

4. The following is a statement of reasons for the indication of allowable subject matter:

Insofar as claim 1 (and dependent claims 2-9) are understood, the art of record does not teach or suggest a

combined size and shape modulation of a pattern in accordance with a color component density of an image which is to be superimposed upon another image.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Curry (each) discloses (Curry 6081345 column 7, line 63 - column 8, line 38; Curry 6092732 column 7, line 63 - column 8, line 38) an image processing arrangement in which one of several patterns corresponding to a given image density level are selected in order to superimpose one image upon another.
